

Ideation Phase

Empathize & Discover

Date	28 October 2026
Team ID	SWTID-2026-6819
Team Leader	Hazna Mariyam. H
Team Members	Anuskha. K Theras Jasmine. M
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

1. Empathy Map

The Empathy Map analyzes the primary stakeholders impacted by the IT procurement process: the **End-User (Employee)** requesting a standard laptop and the **IT Hardware Engineer / Procurement Admin** fulfilling the order.

Primary Persona 1: End-User (Employee)

- **Says:** *"I need my standard laptop configured quickly so I can start my work without delay."*
- **Thinks:** *"Why does placing a standard laptop request take so long to process even after my manager approves it?"*
- **Does:** Places requests via the ServiceNow Service Catalog and frequently checks ticket status or sends follow-up messages to IT helpdesk.
- **Feels:** Frustrated by unpredictable wait times and lack of automated status updates.
- **Pains:** Onboarding delays, lost productivity, and opaque procurement timelines.
- **Gains:** Instant order confirmation, predictable fulfillment times, and faster access to standard hardware.

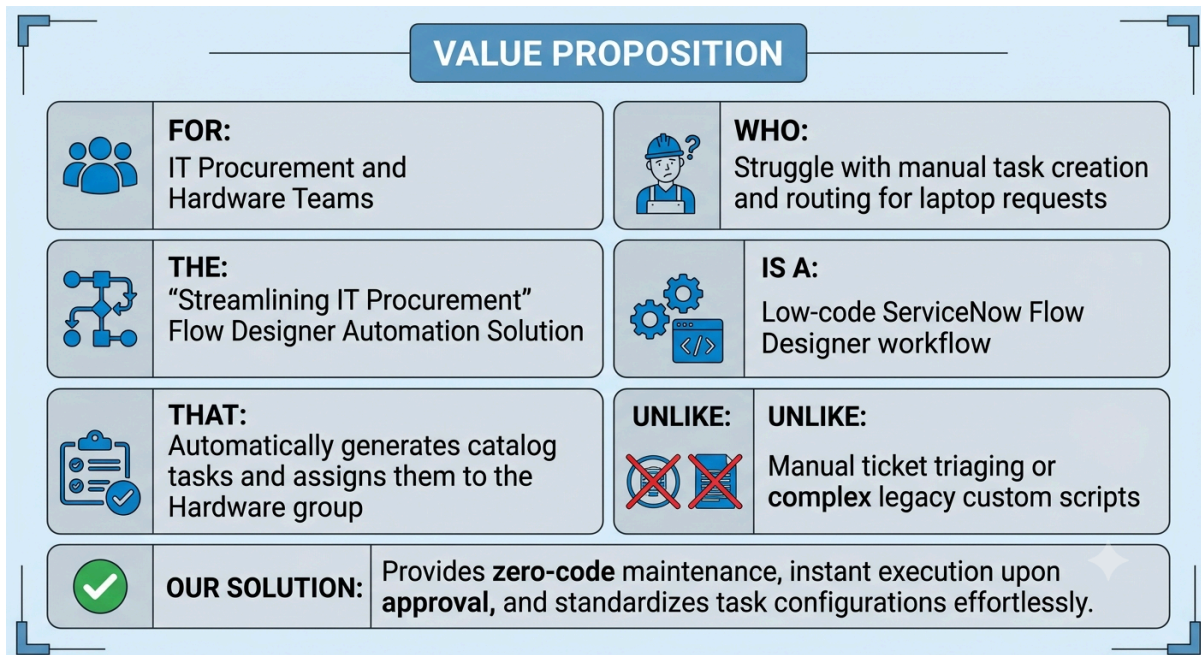

Primary Persona 2: IT Hardware Engineer / Fulfillment Team

- **Says:** *"We get dozens of laptop requests daily, and manually creating and routing tasks wastes valuable time."*
- **Thinks:** *"If approval triggers task creation automatically with all necessary details filled in, we could configure hardware much faster."*
- **Does:** Manually reviews approved requests, creates catalog tasks, assigns them to the Hardware group, and types standard instructions manually.
- **Feels:** Overwhelmed by repetitive administrative tasks and prone to human error or oversight during high-volume periods.
- **Pains:** Manual ticket triaging, inconsistent request descriptions, and delayed task assignment.
- **Gains:** Automated task creation upon approval, pre-populated short descriptions ("Laptop need to Configured"), and direct routing to the **Hardware** assignment group.

2. Team Alignment & Stakeholder Value Proposition

Target Stakeholders

1. **End-Users (Employees / Requesters):** Beneficiaries of faster turnaround times.
2. **IT Procurement & Hardware Team:** Execution group receiving auto-routed catalog tasks.
3. **IT Management:** Operations leads seeking SLA compliance, lower overhead, and clean audit trails.

3. Team Member Roles & Responsibilities

Team Member	Role	Responsibilities
Hazna Mariyam. H	Team Leader & Lead ServiceNow Developer	Flow Designer creation (Standard laptop task), trigger configuration, and end-to-end testing.
Anuskha. K	ServiceNow Specialist / Systems Analyst	Service Catalog integration (Maintain Items binding) and Catalog Task field mappings.
Theras Jasmine. M	Quality Assurance & Documentation Lead	Process validation, approval testing in PDI, screenshots, and GitHub documentation structuring.
