

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	28 October 2026
Team ID	SWTID-2026-6819
Team Leader	Hazna Mariyam. H
Team Members	Anuskha. K Theras Jasmine. M
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

1. Executive Summary & Solution Overview

The objective of this project is to eliminate manual triaging and administrative bottlenecks in standard laptop procurement by implementing an automated low-code solution in ServiceNow.

Using **Flow Designer**, the solution captures approved Service Catalog orders for standard laptops and automatically creates, populates, and assigns a Catalog Task (**sc_task**) directly to the **Hardware** fulfillment team.

2. Business & Technical Requirements

2.1 Business Requirements

- **BR-01 (Automated Fulfillment):** Eliminate manual creation of fulfillment tasks following laptop request approvals.
- **BR-02 (Standardized Assignment):** Ensure all standard laptop setup tasks route directly to the Hardware engineering group without intermediate dispatcher review.
- **BR-03 (Standardized Instructions):** Enforce consistent short descriptions and task details on generated tasks to prevent configuration oversights.

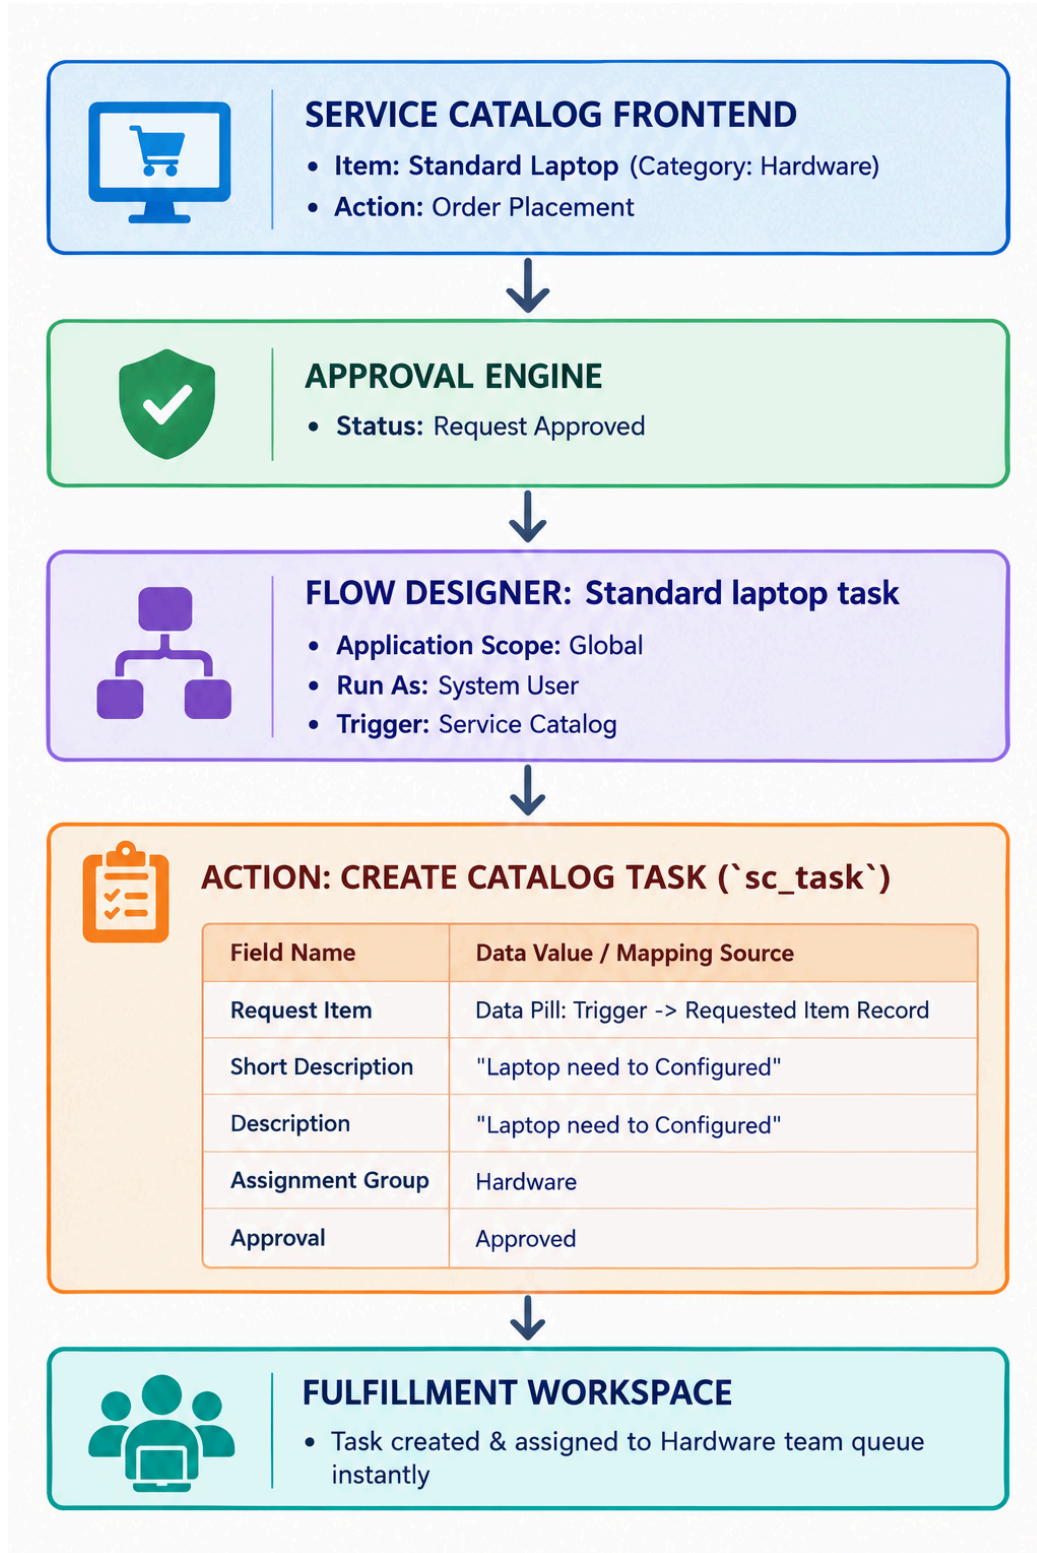

2.2 Functional Requirements

- **FR-01 (Flow Definition):** Create a Flow named **Standard laptop task** in the **Global** application scope with execution authority set to **System User**.
- **FR-02 (Trigger Setup):** Configure the trigger type as **Service Catalog**.
- **FR-03 (Catalog Task Generation):** Implement the **Create Catalog Task** action, dynamically linking the parent Requested Item (**sc_req_item**) via data pill references.
- **FR-04 (Field Value Assignment):**
 - **Short Description** = "Laptop need to Configured"
 - **Description** = "Laptop need to Configured"
 - **Assignment Group** = **Hardware**
 - **Approval** = **Approved**
- **FR-05 (Catalog Binding):** Bind the flow under **Maintain Items -> Standard Laptop -> Process Engine**.

2.3 Technical Environment & System Prerequisites

- **Platform:** ServiceNow Personal Developer Instance (PDI) / Enterprise Instance.
- **Plugins / Modules:** Flow Designer, Service Catalog, ITSM Core.
- **Roles Required:** **admin** or **catalog_admin** (for configuration), **itil** (for task execution).

3. Detailed Solution Architecture & Workflow

4. Hardware & Software Requirements (Environment Specifications)

Component	Minimum Requirement	Recommended Specification
Instance Version	ServiceNow Washington DC / Xanadu / Utah	Latest Developer Instance (PDI)
Browser Compatibility	Google Chrome v100+, MS Edge	Latest Google Chrome
Role Permissions	admin	System Administrator (admin)
Network	Stable Internet Connection	High-Speed Broadband

5. Risk Assessment & Mitigation Plan

Risk Description	Severity	Probability	Impact	Mitigation Strategy
Flow Execution Failure due to Permissions	High	Low	Flow fails during user checkout	Set Run User property to System User during Flow creation.
Duplicate Flow Execution	Medium	Low	Multiple catalog tasks generated	Remove legacy workflows/automations under Maintain Items -> Process Engine before linking the new flow.
Missing Assignment Group	Medium	Low	Task created without group	Ensure the default Hardware sys_user_group record exists in the instance before testing.
