

Planning Logic

Agile Scrum Concepts Overview

- **Sprint:** A fixed period or duration in which a team works to complete a set of tasks.
- **Epic:** A big task or project that is too large to complete in one sprint. It is broken down into smaller tasks (stories) that can be completed over multiple sprints.
- **Story:** A small task that is part of an Epic.
- **Story Point:** A number that represents how much effort a story takes to complete (usually using the Fibonacci series: 1, 2, 3, 5).
 - Very Easy task: 1 Story Point
 - Normal task: 2 Story Points
 - Moderate task: 3 Story Points
 - Difficult task: 5 Story Points

Project Execution Breakdown

Sprint 1

Data & Requirement Gathering (Epic 1)

- Gathering IT Procurement Requirements (USN1): 2 Story Points
- Configuring Service Catalog Form for Standard Laptop (USN2): 1 Story Point

Workflow Logic & Task Setup (Epic 2)

- Creating Flow "Standard laptop task" in Flow Designer (USN3): 3 Story Points
- Setting Trigger to Service Catalog & Configuring Create Catalog Task (USN4): 3 Story Points
- Assigning Hardware Group & Setting Short Description (USN5): 3 Story Points

Total Story Points in Sprint 1 = 2 + 1 + 3 + 3 + 3 = 12 Story Points

Sprint 2

Catalog Binding & Trigger Setup (Epic 3)

- Linking Flow to Standard Laptop Item under Maintain Items (USN6): 2 Story Points
- Setting Execution Context as System User (USN7): 2 Story Points
- Activating the Flow Designer Workflow (USN8): 2 Story Points
- Placing Test Order in Service Catalog (USN9): 4 Story Points

Testing & Verification (Epic 4)

- Verifying Automatic Task Generation & Hardware Assignment (USN10): 5 Story Points

Documentation & Submission (Epic 5)

- Creating Project Artifacts, Documentation & GitHub Upload (USN11): 5 Story Points

Total Story Points in Sprint 2 = 2 + 2 + 2 + 4 + 5 + 5 = 20 Story Points

Velocity Calculation

- **Total Story Points in Sprint 1:** 12
- **Total Story Points in Sprint 2:** 20
- **Total Story Points:** 12 + 20 = 32 Story Points
- **Number of Sprints:** 2

$$Velocity = \frac{TotalStoryPointsCompleted}{NumberOfSprints} [cite: 2]$$

$$Velocity = \frac{32}{2} = 16StoryPointsperSprint[cite: 2]$$

Summary: Your team's velocity is **16 Story Points per Sprint**.
